PROFILE

Fullstack developer with three systems in production running the day-to-day operations of real businesses: a vertical ERP for automotive operations (inventory, sales, workshop), a WMS with lot/FEFO inventory and a self-service booking system. I build the frontend with React and TypeScript and the backend with Java and Spring Boot, shipping REST APIs on PostgreSQL with JWT authentication.

Before writing code I ran inventory and ERPs (SAP, SIRA) on the shop floor. That domain knowledge is what I use to design the tools a business actually needs instead of generic screens. Associate degree in Computer Science and Graphic Design. Looking for a web development role: frontend, backend or fullstack.

PROJECTS

The production systems have private codebases; the linked repositories are architecture samples. For full detail visit my portfolio at [elicatari.com](#).

- **Real Motors** — *In production · Fullstack* - Automotive ERP (VIN/SKU inventory, sales notes, reservations, workshop). 14+ users, 200+ vehicles, 300+ accessories; replaced paper-based work. *Architecture sample: [backend](#) · [frontend](#)*
- **BR Logística** — *In production · Fullstack* - WMS with DRAFT → CONFIRMED documents and lot/FEFO inventory. Replaced paper control with no history or expiry tracking. *Architecture sample: [backend](#) · [frontend](#)*
- **Happy Pet** — *In production · Fullstack* - Self-service booking with concurrent slots enforced in PostgreSQL. Replaced paper and WhatsApp. *Architecture sample: [backend](#)*
- **DTE Issuer** — *Personal project · Backend* - DTE invoicing microservice (hexagonal, Keycloak, RabbitMQ, RLS). SII simulated. *[full source code](#)*

PROFESSIONAL EXPERIENCE

Real Motors — Web Developer and Designer · March 2026 – Present

- End-to-end owner of the operations ERP in production ([realmotors.cl](#)): requirements gathering with the business, data model, development, deployment and user support.
- Frontend in React, TypeScript, Vite and Tailwind; API in Java 21, Spring Boot, Spring Security (JWT) and PostgreSQL, with Flyway migrations.
- PDF reports (JasperReports), image uploads (Cloudinary), CSV import/export, role-based access and deployment on Cloudflare Pages and Railway.

Dicata — IT Lead / Inventory Control · December 2024 – February 2026

- Took part in the SIRA ERP rollout and provided user support (hardware and software).
- Ran inventory on that same system: stock levels, goods in/out and cycle counts.

SECAM — Graphic Designer · November 2022 – November 2024 · September 2017 – July 2018

- Visual identities and advertising material, both print and digital.
- Image and video editing tailored to each client.

Friex — Stock Control Manager · August 2018 – July 2021

- Nestlé product inventory on SAP ERP: availability, shrinkage, goods in/out and cycle counts.

42 Motors — Support Technician / IT Lead · February 2015 – July 2017

- Company-wide ERP rollout and ticket-based user support (hardware and software).
- Basic-to-intermediate network administration, user training and security camera installation.

EDUCATION

Instituto Universitario Tecnológico Industrial Rodolfo Loero Arismendi — Barquisimeto, Venezuela

- **Associate Degree in Computer Science (TSU en Informática)** · August 2026 · Técnico Superior Universitario equivalent to TNS in Chile.
- **Graphic Designer** · July 2017

SKILLS

Frontend: HTML5, CSS, Tailwind CSS, JavaScript, TypeScript, React, Vite, Astro. **Backend:** Java 21, Spring Boot, Spring Security, JPA / Hibernate, REST API, Flyway, OpenAPI, RabbitMQ, Keycloak.

Databases: PostgreSQL (SQL), MongoDB. **Testing and CI/CD:** unit and integration testing (JUnit, Testcontainers), Playwright, Postman, GitHub Actions, Docker.

Tooling - practices: Git and GitHub, Scrum, Kanban methodologies. **Design:** Illustrator, Photoshop, Premiere Pro, GIMP, Blender.

Additional: networking, hardware maintenance, Windows / GNU/Linux / macOS. **Languages:** Spanish (native) · English: upper-intermediate reading and comprehension, basic speaking.
